

PRODUCT GROUP 140

Series 140-00/692 Special White for Rubber/Latex

This special white has been developed for direct printing onto Latex and rubber and shows – next to its significant adhesion – long-term durable elastic film building properties. Although created for pad printing, this ink can also be applied by screen printing when retarder, Series 10-03432, is being added. The system is fast drying and utterly suitable for multi-color pad printing.
