PRODUCT GROUP 700

Series 700-030

Anti-Static Paste for PG 700

This highly efficient Anti-Static Paste Series 700-030 was developed to avoid static problems in pad printing processes. An addition of 5 % by weight should reduce or even eliminate problems like „thread formation“ or „spider-webbing“. Under difficult printing conditions (low humidity – higher temperatures, substrates that tend to static problems, a. s. o.) it is even possible to add up to 20% by weight.

The Anti-Static Paste Series 700-030 is suitable for all solvent based pad printing inks of Product Group 700 and has no influence to adhesion or resistances.

Disclaimer

Please thoroughly read the Material Safety Data Sheet (MSDS) prior to processing. The Material safety Data Sheets according to 91/155/EWG form, contain indications of hazardous ingredients. Exposure levels and instructions for precautions when processing, handling and storing as well as first aid. The information given in the MSDS refers to the processing as described within this technical leaflet. Above data are based on laboratory tests and field experience. All therein contained statements are to the best of our knowledge without any obligation from our side and do not discharge from testing the product by yourself. In doubtful cases, you are kindly requested to either perform your own tests or refer to our technical staff. Application, use and processing of the delivered products are beyond our control and are therefore at your own risk and responsibility. Printcolor is thus free from any guarantees or liabilities. In cases of justified complaints, Printcolor can only be made liable for the counterpart of the utilized ink system. Adding not stated products or foreign / competitors products, is solely at your own risk and liberates Printcolor of any later calls; especially in cases when damages occurred and which have been caused through use of products of foreign type. This leaflet replaces all former issues. (11/2009)
