

Complete Construction System

The *Dimensionals by Sands*[®] translucent PVC inlays for card construction are available in 13 standard design patterns. Each of these inlay patterns has the unique ability to refract light and transmit color once laminated between two PVC cores.

H.W. Sands Corp is now offering solid color PVC core sheets with Pantone[®] matching for use with our *Dimensionals by Sands*[®] inlays.

With such versatility in the early stages of card construction, the pattern and color combination possibilities are immense.

Pattern Name	Product #	Orientation	Standard PVC Colors	Product #
Oil Slick	DDA5540	Yes	Yellow	DDA5540
Zebra	DDA5560	Yes	Cranberry	DDA5560
Silver Streak	DDA5590	Yes	Orange	DDA5590
Midnight Stone	DDA5760	No	Red	DDA5760
Silver Stone	DDA5770	No	Pink	DDA5770
Glacier	DDA5850	Yes	Green	DDA5850
Matrix	DDA6120	Yes	Purple	DDA6120
Iced Pearl	DDA6230	No	Brown	DDA6230
Iced Onyx	DDA6260	No	Black	DDA6260
Iced Prism	DDA6290	No	Blue	DDA6290
Static	DDA6570	No		
Kaleidoscope	DDA7180	No		
Pearlescent Pools	DDA8130	No		

In addition to colored PVC backings, we also suggest overprinting the top surface PVC layer with a High-Transparent Ink (Pantone[®] matching also available) for an added effect.

Basic High-Transparent Colors	Product #	Basic High-Transparent Colors	Product #
