

ADA1753 Product Data Sheet

Photoluminescent Yellow/Green Organic Pigment

ADA1753 is a photoluminescent organic pigment. In powder form this pigment changes from an off-white color to yellow/green after being excited by light. The pigment has a high initial luminance and long afterglow time. It is light-resistant, aging-resistant and chemically stable (more than 10 years of life span). It is non-toxic, non-radioactive and non-flammable.

ADA1753 can be applied in switch-off home appliance, control board, flashlight, stairway, fire protection facility, fire alarm, lifesaving tools, buildings and safety fields.

Typical physical properties

Luminance after 30 min (mcd/m^2) = 142

Luminance after 60 min (mcd/m^2) = 20

Appearance at visible light: Off-White powder

Photoluminescent color: Yellow/Green

Particle size: 25-30 μm

Appearance at visible light

Photoluminescent color

All applications using this product should be thoroughly tested prior to approval for production.
