

Scratch & Sniff Encapsulated Fragrances

Ordering Specifications

Designed for print systems of all types, please specify parameters: Printing Method, Solvent(s) Compatible, Drying/Curing Method, Substrate, etc. Non-Standard fragrances can be made available upon request, unless fragrance desired is a Custom, brand specific scent. There is a 1 kilogram minimum order quantity for all standard fragrances. Desired ink base will be reflected in the below pricing. Dry encapsulates are available without varnish as well. All inks will be shipped as a two-part system (encapsulates & varnish) due to a product lifetime of 3-4 days upon mixing. Dry encapsulates may be purchased without ink varnish as well.

Custom Fragrances

A Non-Standard/Custom fragrance encapsulation will yield approximately **4 kilograms** of ink. Additional kilograms ordered beyond the custom encapsulation quantity can also be provided. For brand specific scents, a minimum 1 kilogram of oil-based fragrance must be supplied in order to properly facilitate the custom encapsulation. *The oil must be free of water and alcohol ingredients, must have a boiling point over 100°C, include an MSDS sheet and shipped in an unbreakable container.*

Samples

Sample ink quantities up to 1 kilogram can be supplied. Sample fragrances are generic and not regularly stocked. Please speak with an H.W. Sands representative for further assistance.
